

Technology Check-up

“Where are our main risks and priorities?”

Focused technology, security, operations and cost assessment with a prioritized action plan.

DESIGNED FOR

Leadership teams seeking an independent view before committing to technology investment.

WHAT WE DO

- Review critical services, architecture, ownership and supplier dependencies.
- Assess security controls, recoverability and operational practices.
- Review cloud, software and telecom cost visibility.

WHAT YOU RECEIVE

- Executive assessment with evidence, gaps and business implications.
- Prioritized risk and opportunity register with proposed owners.
- Practical action plan covering immediate improvements and next steps.

THE BUSINESS OUTCOME

A shared view of what needs attention first, why it matters and who should act.

HOW WE ENGAGE

Agree the services, locations and evidence available; interview key stakeholders and validate findings.

Track action closure, ownership coverage and reduction of priority gaps.

ENGAGEMENT MODEL

Fixed scope and fee
