

Secure & Resilient

“Can we protect and recover critical services?”

Security baseline, identity review, recovery assessment and roadmap.

DESIGNED FOR

Organizations seeking a practical view of exposure and recovery readiness for critical services.

WHAT WE DO

- Review identity, privileged access and priority security controls.
- Assess backup, restoration evidence and service dependencies.
- Agree recovery objectives and prioritize risk-based improvements.

WHAT YOU RECEIVE

- Security and resilience baseline with supporting evidence.
- Prioritized remediation roadmap and control owners.
- Agreed controls implemented and recovery exercises documented.

THE BUSINESS OUTCOME

Clearer exposure, stronger controls and recovery plans supported by validation.

HOW WE ENGAGE

Agree critical services and assessment boundaries; schedule any implementation or recovery tests with service owners.

Track remediation closure, access-control coverage and recovery-test results.

ENGAGEMENT MODEL

Assessment + implementation
